Job Title & Reference: **IT Distributed Frameworks Development Azure Devops Expert** (Ref: 3441ITADE)

1. Context of the mission / Objective(s) of the job

AG Insurance is actively looking for an Azure DevOps specialist to join its Distributed Frameworks. The Distributed Frameworks team is a small team of independent architects and software engineers who are responsible for the creation, architecture and maintenance of the internally developed corporate .NET framework as well as Azure DevOps as CI/CD platform for the entire company

Concretely we are looking for someone to join the team and take charge of the Azure DevOps Platform to revisit our governance and security model, automate operational procedures using .NET and managing standardized YAML Templates to build all applications in a uniform way.

2. Mission period

Expected Start date: Asap

Duration: 12 months (Depending on project evolution, extension is possible)

3. Language requirement

Languages	Speaking	Reading	Writing	Mandatory	Preferable
English	2	2	2	X	
Dutch	3/1	3/1	3/1	X*	
French	3/1	3/1	3/1	X*	

1 = Basic – 2 = Good – 3 = Fluent

*Fluent for one language & minimum a basic knowledge of the other language.

4. Localisation

Brussels centre.

5. Level of education required

Master (or equal through experience) with 3 years of experience in managing Azure DevOps Organisations

6. Required Knowledge and Experience

Personal Skills (soft skills - intangible qualities or traits that enhance our interactions)

Mandatory

- Leadership and delegation with control
- Interested in latest developments and new evolutions within the Microsoft development landscape
- Problem Solver
- Flexible & pragmatic
- Excellent communication skills
- Pro-active

Technical experience required (hard skills related to physical or digital tools)

Mandatory

- Expert in Azure DevOps
- YAML Templating
- Security governance
- Expert in C#
- Expert in technical writing
- Experience in REST API Development (JSON, Swagger, ..)
- Experience in Azure DevOps Rest API

Preferable

- Experience .NET 10
- Experience as a .NET application Architect
- Experience with the Azure stack
- Experience in NodeJs or Powershell
- Experience in Azure DevOps customization
- Custom Build / Release tasks
- Experience in SAST / DAST

7. Objective of the job

Your job:

- Manage the Security Model of Azure DevOps
- Setup and Release YAML Templates
- Automate Operational procedures on the platform
- Discuss and align solutions between the architects in the team
- Coach and support the team's developers
- Provide documentation, training, and hands-on support for the different teams using Azure DevOps

Concrete examples:

- Transition the Security model of Azure DevOps to a more fine grained approach
- Document the usage of YAML build templates provided by the team

8. Instructions to suppliers

We remind you that all “mandatory” topics MUST be encountered. They are criteria of exclusion if the minimum level required is not reached.

All information must be submitted following the required format explained in the weekly mail.
